

Agro-tourism chain

innovative solutions for Short Food Supply Chains

Campden BRI Hungary

December 2019

Project code: 773785

Project acronym: Smart Food Supply Chains

Internal template:

Template for good practice cases

Work package number: T2

WP leader: CBHU

Work package title: Technological and non-technological innovations

Document issued by:

Delivery month:

Version:

Document language: ENG

Dissemination Level		
PU	Public	
PP	Restricted to other programme participants	
RE	Restricted to a group specified by the consortium	
CO	Confidential, only for members of the consortium	

1. Title of the case description

Agro-tourism chain

2. Indicate your role in the Smart Food Supply Chain:

- individual member of the chain:
- chain operator:
- network operator:
- association:
- technical, scientific, or management expert:
- advisor:
- policy maker:
- other:

3. Indicate the region (if applicable): TRUEFOOD

4. WP2 Cross-reference table

Please indicate with an X in the relevant box of the matrix for which needs and the steps / functions of the supply chain the described innovative solution is applicable

		Individual steps of the SFSC							Short food supply chain as whole						
		1	2	3	4	5	6	7	8	9	10	11	12	13	14
Needs of the consumers (citizens)	food safety														
	food quality														
	trust														
	ethical aspects														
	accessibility														
Needs of the chain actors	fair price														
	increased negotiating power														
	shared use of available resources														
	product development support														
	access to markets and consumers														
	access to infrastructure

- 4: Processing and packaging**
- 5: Storage**
- 6: Logistics**
- 7: Sale**
- 8: Product integrity, authenticity, transparency**
- 9: Marketing concepts**
- 10: Food chain management and networking for enhancing cooperation among chain actors**
- 11: Business modelling**
- 12: Policy environment**
- 13: Legal requirements**
- 14: Labelling**

5. Short description of the innovative solution

- **Describe the specific need or problem being addressed by the case and please explain what is the novelty of this innovative solution**

The consumer's awareness and the consumers' knowledge about local products of the local gastronomy is usually insufficient. The local values usually are unknown. From that reason the local manufacturers' products need promotion to increase their sell.

- **Describe the enabling function(s) and the practical benefit(s)-(e.g. for which types of problems and opportunities is used and can it be used, and how)**

In the Agro-tourism, where there is a historic sight, the manufacturing places of the local food products are shown as a tourist sight of the certain region/place to the tourists. In a frame of guided and/or non-guided tours, which can be organized by a special travel agency, the direct sale in-place is possible. It gives experience and knowledge about the origin of the product for the customers, furthermore, if they enjoyed it, the word-of-mouth advertising is one of the best marketing tools. The hotels, which are in contact with the travel agency, offer local products in the menu for their guests.

- **Describe the method/procedure/technology/solution implemented. (Please explain, whether the innovative method is a product / service / process / marketing or organisational / management innovation) After completing the description, please indicate, whether this innovation is a technological or non-technological one.**

Strenghts

- Increasing consumer awareness and his gastronomic knowledge,
- It can improve the rate of direct sale of small traditional food manufacturers
- A tool for shortening the supply chain

Opportunities

- Regional festivals as one of the tools of agro-tourism have strong promotional impact,
- Organized programs e.g.: farm visits (mangalitza farm, goat cheese manufacturer) , study tours.
- The wine trails (the plants of manufacturer's, the wine cellars can be visited by the tourists following a suggested itinerary,
- Cross marketing of different traditional products, which have synergic effects on each other e.g.: wine and sausage, wine and cheese on-site of the traditional food manufacturers,
- Shopping and tourism can be linked together,

- To discover our own region where traditional food products are manufactured,
- short distance tourism and reduced time for travel,
- Visitors trust in the traditional products, that they can see under manufacturing during the site visit

Weaknesses

- High costs of organizations and advertisements of regional festivals,
- Lack of home pages of traditional food manufacturers,
- Lack of recognition of collaboration between the small food manufacturers and small restaurant owners,
- Lack of knowledge of cross marketing of small food manufacturers,
- Low number of institutions organizing agro-tourism events
- Low level of willingness of cooperation of traditional food manufacturers with 3rd parties and other institutions

Threats

- Bad weather e.g.: rainfall during the scheduled regional opened air festivals,
- The trend of outgoing tourism to abroad (all-inclusive and last minutes trips) becomes stronger,
- Bankrupt of the small manufacturers because the bad economic situation.

technological

non-technological

- **Describe the business, which implemented the innovated solution (size, country, region, location, type of food)**
- **Describe the distribution channels of the product(s)**
- **Describe what makes the innovation work.**
- **Describe the specific prerequisites for the business related to the implementation of the method and/or related to the location, method, procedure, solution**
 - a: **List the relevant necessary resources (including the estimated cost) for the specific innovation.**
Please list the relevant ones only (list is annexed)
 - b: **List the relevant necessary capabilities for the specific innovation.**
Please list the relevant ones only (list is annexed)

6. Describe the results, achievements and typical failures

7. Summarize what makes the case to a good practice for the members of the SFSCs (e.g. lessons learned)

A good example from Hungary:

Taste of Hungary - 5 day farm visit, a real AgroTourism experience

AgroTourism is a fast growing activity in the country. Since Hungary is an EU member, farmers from EU countries might be interested to see, how their Hungarian friends are doing, what is the real situation in the Hungarian agriculture. Well, you can take advantage of the invitation of AgroTourism Team and enjoy Hungarian farmers' hospitality, cottage accommodation, food, wine, eco-tourism, meeting with farmers and many more. Look at the following suggestion:

That's a 5 days organized journey. On each day in the visited villages or towns the local spectacles and historical values are visited, the local restaurants and catering have been resorted.

8. Aspects, methods for transfer of methods for other SFSC members

9. Recommendations for members of other SFSCs for further applications

.....
10. More information is available at (web), if it is relevant

TRUEFOOD, Traditional United Europe Food

Annex

1. Checklist for necessary resources (tangible and non-tangible):

- materials (access to: raw materials/ ingredients - including volume, land – including size, packaging materials)
- human: labour force: size, knowledge & skills (production, technical, marketing, managerial, ICT, financial, etc.)
- technology: patents, know-how, trademarks, copyrights, trade secrets
- infrastructure, equipment, facilities, - size, minimum volume of production/sales, IT infrastructure
- information, reputation, brand, trust
- financial*

*: estimated cost:

0 - 10 000 Eur
10 001 - 50 000 Eur
50 001 - 100 000 Eur
100 001 - 300 000 Eur
300 001 – 1 000 000 Eur
1 000 000 Eur above –

- other specific necessary resources for the application of the specific innovation

2. Checklist for the necessary capabilities

- **food safety:**
 - basic skills to comply with the EU food safety regulations
 - ability to understand what makes the product safe (the key controls, which ensure the safety of the product – biological, chemical and physical hazards, providing the safety shelf life of perishable products)
 - food safety culture (motivation, responsibility for food safety) and basic skills for the implementation of HACCP

- **food quality:**
 - ability to define the target segments of consumers for SFSCs
 - ability to define the product characteristics which are (tacit) basic requirements for the target segment(s) of consumers;
 - ability to define which product attributes/levels and augmented services represent an added value for the target segments of consumers;
 - food quality culture (motivation, responsibility for food quality);
 - production experiences which help to provide the expected quality reliably, uniformly;
 - ability to provide distinguishable quality which meets the needs of the targeted consumer segment;
 - meeting (local) legal requirements, application of the labelling rules;
 - ability to access the consumer willingness to pay for specific products of SFSCs.

- **trust:**
 - ability to ensure product integrity, authenticity and transparent information for the consumers (including systems, tools);
 - ability to access external trust enhancers (third party certification, internal certification system, participatory guarantee systems);
 - application of the labelling rules and branding (mandatory and voluntary);
 - ability to meet third party certification requirements

- **ethical aspects**
 - ability to understand consumer needs for ethical behaviour related to the specific product(s) of the SFSCs;
 - culture for ethical food production and supply;
 - ability to implement necessary measures to ensure ethical food production and supply;
 - ability to access the consumer willingness to pay for products meeting ethical aspects

- **accessibility to consumers:**
 - ability to organize logistics efficiently and to exploit innovative solutions and distribution channels;
 - efficient, innovative sales methods;

- ability to develop and implement new business models for ensuring access of consumers to products and augmented services;
- **fair price:**
 - collecting marketing information;
 - ability to enhance and maintain cooperation among chain actors including the combined use of available complementary resources, capabilities, competences of SFSCs actors, networking, understanding the principles of food value chain management;
 - ability to define, develop or maintain unique quality of products and augmented services;
 - ability to develop and implement new business models;
 - ability to access the consumer willingness to pay for fair price
- **increased negotiation power:**
 - collecting marketing information;
 - ability to enhance and maintain cooperation among chain actors including the combined use of available complementary resources, capabilities, competences of SFSCs actors, networking, understanding the principles of food value chain management, cooperation culture;
 - ability to define, develop or maintain unique quality of products and augmented services;
 - ability to develop and implement new business models;
- **shared use of available resources:**
 - ability to enhance and maintain cooperation among chain actors including the shared and combined use of available complementary resources, capabilities, competences of SFSCs actors, networking, understanding the principles of food value chain management, cooperation culture;
 - the level of value chain management culture;
 - ability to access the consumer willingness to pay for food with reduced environmental impacts

- **input for R+D:**
 - ability to monitor, research, evaluate, and understand the needs and wants of customers and consumers;
 - ability to develop new products, processes, packaging, preservation techniques, systems and access to new markets, including in other categories;
 - access to innovative technologies; distribution and marketing solutions and methods. management systems;
 - access to local input for R+D covered by other aspects

- **access to markets: and market success**
 - effective promotion, customer service, efficient and innovative sales methods;
 - ability to understand consumer's needs;
 - ability to organise logistics efficiently and to exploit innovative solutions and distribution channels,
 - unique value propositions;
 - ability to develop and implement new business models for ensuring access of consumers to products and augmented services, develop the market accessibility for the suppliers.
 - stock control;
 - ability to access to required raw materials within a restricted geographical area

- **access to infrastructure:**
 - ability to use existing own infrastructure in a focused way to serve consumer needs or to combine it with complementary infrastructures of other SFSC actors, cooperation culture;

- **management:**
 - to implement management systems for vision, planning, implementing), coordinating, controlling, monitoring, continuously;
 - improving; ability to motivate, authorize staff;

- **production, processing:**
 - management system, production experience, specific controlling, monitoring, continuously;
 - willingness to consider and ability to evaluate the adoption of TECI and NTI in the current production processes;
 - any additional specific resources necessary for the application of the specific innovation.
